BET Research Institute of Environment & Public Health (BRIEPH)

Bridging 'One Health' Principles with Public Health Excellence.

About BRIEPH

BRIEPH is a leading institute engaged in studies, research, and development, focusing on the intricate relationship between public health and the environment. Our multifaceted role encompasses education, research, product development, projectz consultancy and government-accredited training activities. We are crafting strategies to uplift environmental quality and foster sustainable practices.

Motto

*Accelerate your
Career & Growth through
Applied Science.*

Our Mission

At BRIEPH, we are dedicated to advancing the synergy between public health and the environment. Our comprehensive approach integrates education, research, product development and government-recognized skill training programs to foster sustainable practices and enhance public health and well-being.

One Health Perspective

Embracing the One Health philosophy, we adopt a collaborative, multisectoral, and transdisciplinary approach. Operating at local, regional, national, and global levels, our goal is to achieve optimal health outcomes by recognizing the interconnectedness between people, animals, plants, and their shared environment.

Our Services

A. Education

Explore diverse courses in environmental science and public health. Equip students with skills to address health and environmental challenges.

B. Research & Product Development

Conduct groundbreaking projects deepening our understanding of public health and the environment. Contribute to discoveries shaping the future of health and sustainability.

C. Business Consultancy

Enhance food safety with Design Consultancy for Food Processing plants. Benefit from Contract Research for healthier, safer food supply.

D. Training Programs

a) Certified Quality Control Training Programs:

Short-term courses for Water, Waste Water, Food, and Soil. Tailored for chemical or biological science graduate/postgraduate students. Cultivate skilled professionals in water, food, and related segments.

b) Short-term Technical Job Training:

Courses in Water Purification, Filtration, Waste Water Treatment, and more. Designed for engineering and technical students. Fosters quality design engineers for pollution management.

c) HACCP Courses:

Expertise in Hazard Analysis and Critical Control Points.

d) Academic Projects for Students:

Meaningful projects for chemical or biological science graduate/postgraduate students.

e) Internship Programs:

Real-world applications of laboratory-oriented skills.

f) Industrial Visits:

Hands-on experience in practical learning.

Our Audience

University departments, colleges, technical institutions, students, and food-based firms.

Join BRIEPH

Embark on a journey of discovery, learning, and innovation. Together, let's shape a healthier future through education, research, and collaborative training programs
